

CUSTOMER TESTIMONIAL

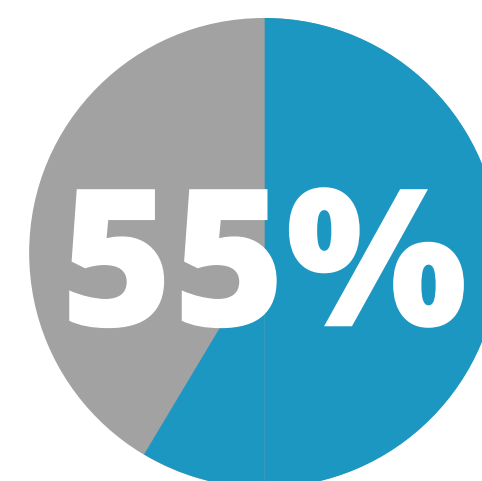

**SELLING TANK MONITORING
TO REAP DELIVERY SAVINGS**

REAP DELIVERY SAVINGS AT A REDUCED COST

“Tank monitoring is a way for us to build better, stickier relationships with our customers. Early on, we realized that our customers see tank monitoring as a valuable service and are happy to pay for it, especially those with generators and pool heaters.

They gain peace of mind by being able to check the tank levels through the app, and we ensure their tanks are kept full better than our competitors. Best of all, by selling tank monitoring services we are able to reap delivery savings at a reduced cost. It’s a win-win!”

**OF OUR MONITORS ARE PAID
FOR BY CUSTOMERS!**
